

The Great Big Science Week Debate

So you want to be a whacky scientist and have some fun? The first step is to question everything. A scientist's favourite words are 'What, Why, Where, When and How?'

It is these very questions that have led to the discovery of MP3 players, mobile phones, computer games, digital cameras, TVs, the internet and every other wonderful invention you can think of.

To get you started on your path to scientific discovery you can start by asking the very important questions of what, when, where, why and how in the big Science Week Debate.

Why not get your class, your family or your friends to take part in the big science week debate?

1. Pick a topic / motion from the big science week debate topic list on the right.
2. Split into teams - one side for the motion and one side against the motion.
3. Get debating, shout it out & have fun!

Don't be greedy!
Make sure and share all the fun you had during your big science week debate and upload photos, videos & comments to www.scienceweek.ie

Debate Topics

Choose a debate topic, create a motion & begin your great big science week debate.

1. Did we really land on the moon?
2. Do aliens exist?
3. Pluto - should it be a planet or a plutoid?
4. Should mankind invest in the exploration of space?
